**Why Anesthesiologist Needs SafeLM®**

**Malposition Occurs in 50-80% Laryngeal Mask Blind Placements ! <sup>1</sup>**

1. The non-fasted patient presents increased risk
2. The ability to confirm perfect LMA placement, visualize a patent airway and intubate under vision changes the game.

**Advantages of SafeLM® Video Laryngeal Mask**

**SafeLM® is the First and Only View Adjustable Video Laryngeal Mask, fits the conception of Next Generation Laryngeal Mask. <sup>2</sup>**

1. Adjustable camera angle, easy to expose glottis and avoid malposition
2. Increased one-time success rate of placement and ventilation
3. Compact design, user friendly and simple to manipulate
4. Perform intubation while maintaining oxygenation

**Disinfection of SafeLM® Videoscope**

Using enzyme cleanser, neutral pH soap liquid or sodium bicarbonate solution with concentration of 8%~10% as cleansing agents, and peracetic acid solution with 0.08% concentration or isopropanol with 70% concentration as disinfectants.
